Agricultural Marketing Service

January 15, 1941

eserve

Reserve

Gentlemen:

Attached is a copy of the detailed report of the November 6 vegetable-seed survey, conducted by the Agricultural Marketing Service at the request of the National Defense Advisory Commission through the Interdepartmental Seed Committee. The cooperation received shows clearly that the vegetable-seed trade recognizes the value of reliable information relating to present and prospective supplies of seeds.

This memorandum and accompanying numbered report are being sent to each of the 227 vegetable seed growers and dealers who furnished information for use in the report. We wish to thank all those who cooperated with us in making this survey a success. Numbered among the 227 are the largest growers and dealers in the United States.

Your attention is called to the fact that this detailed report covering 257 kinds, varieties and types of vegetable seeds has been especially prepared for you, as one of these cooperators, and for the National Defense Advisory Commission, other Governmental agencies and technical collaborators.

The Agricultural Marketing Service released today a report of this survey which summarizes the results for the 50 kinds of vegetable seeds. That report is for general public distribution. A copy of it is enclosed.

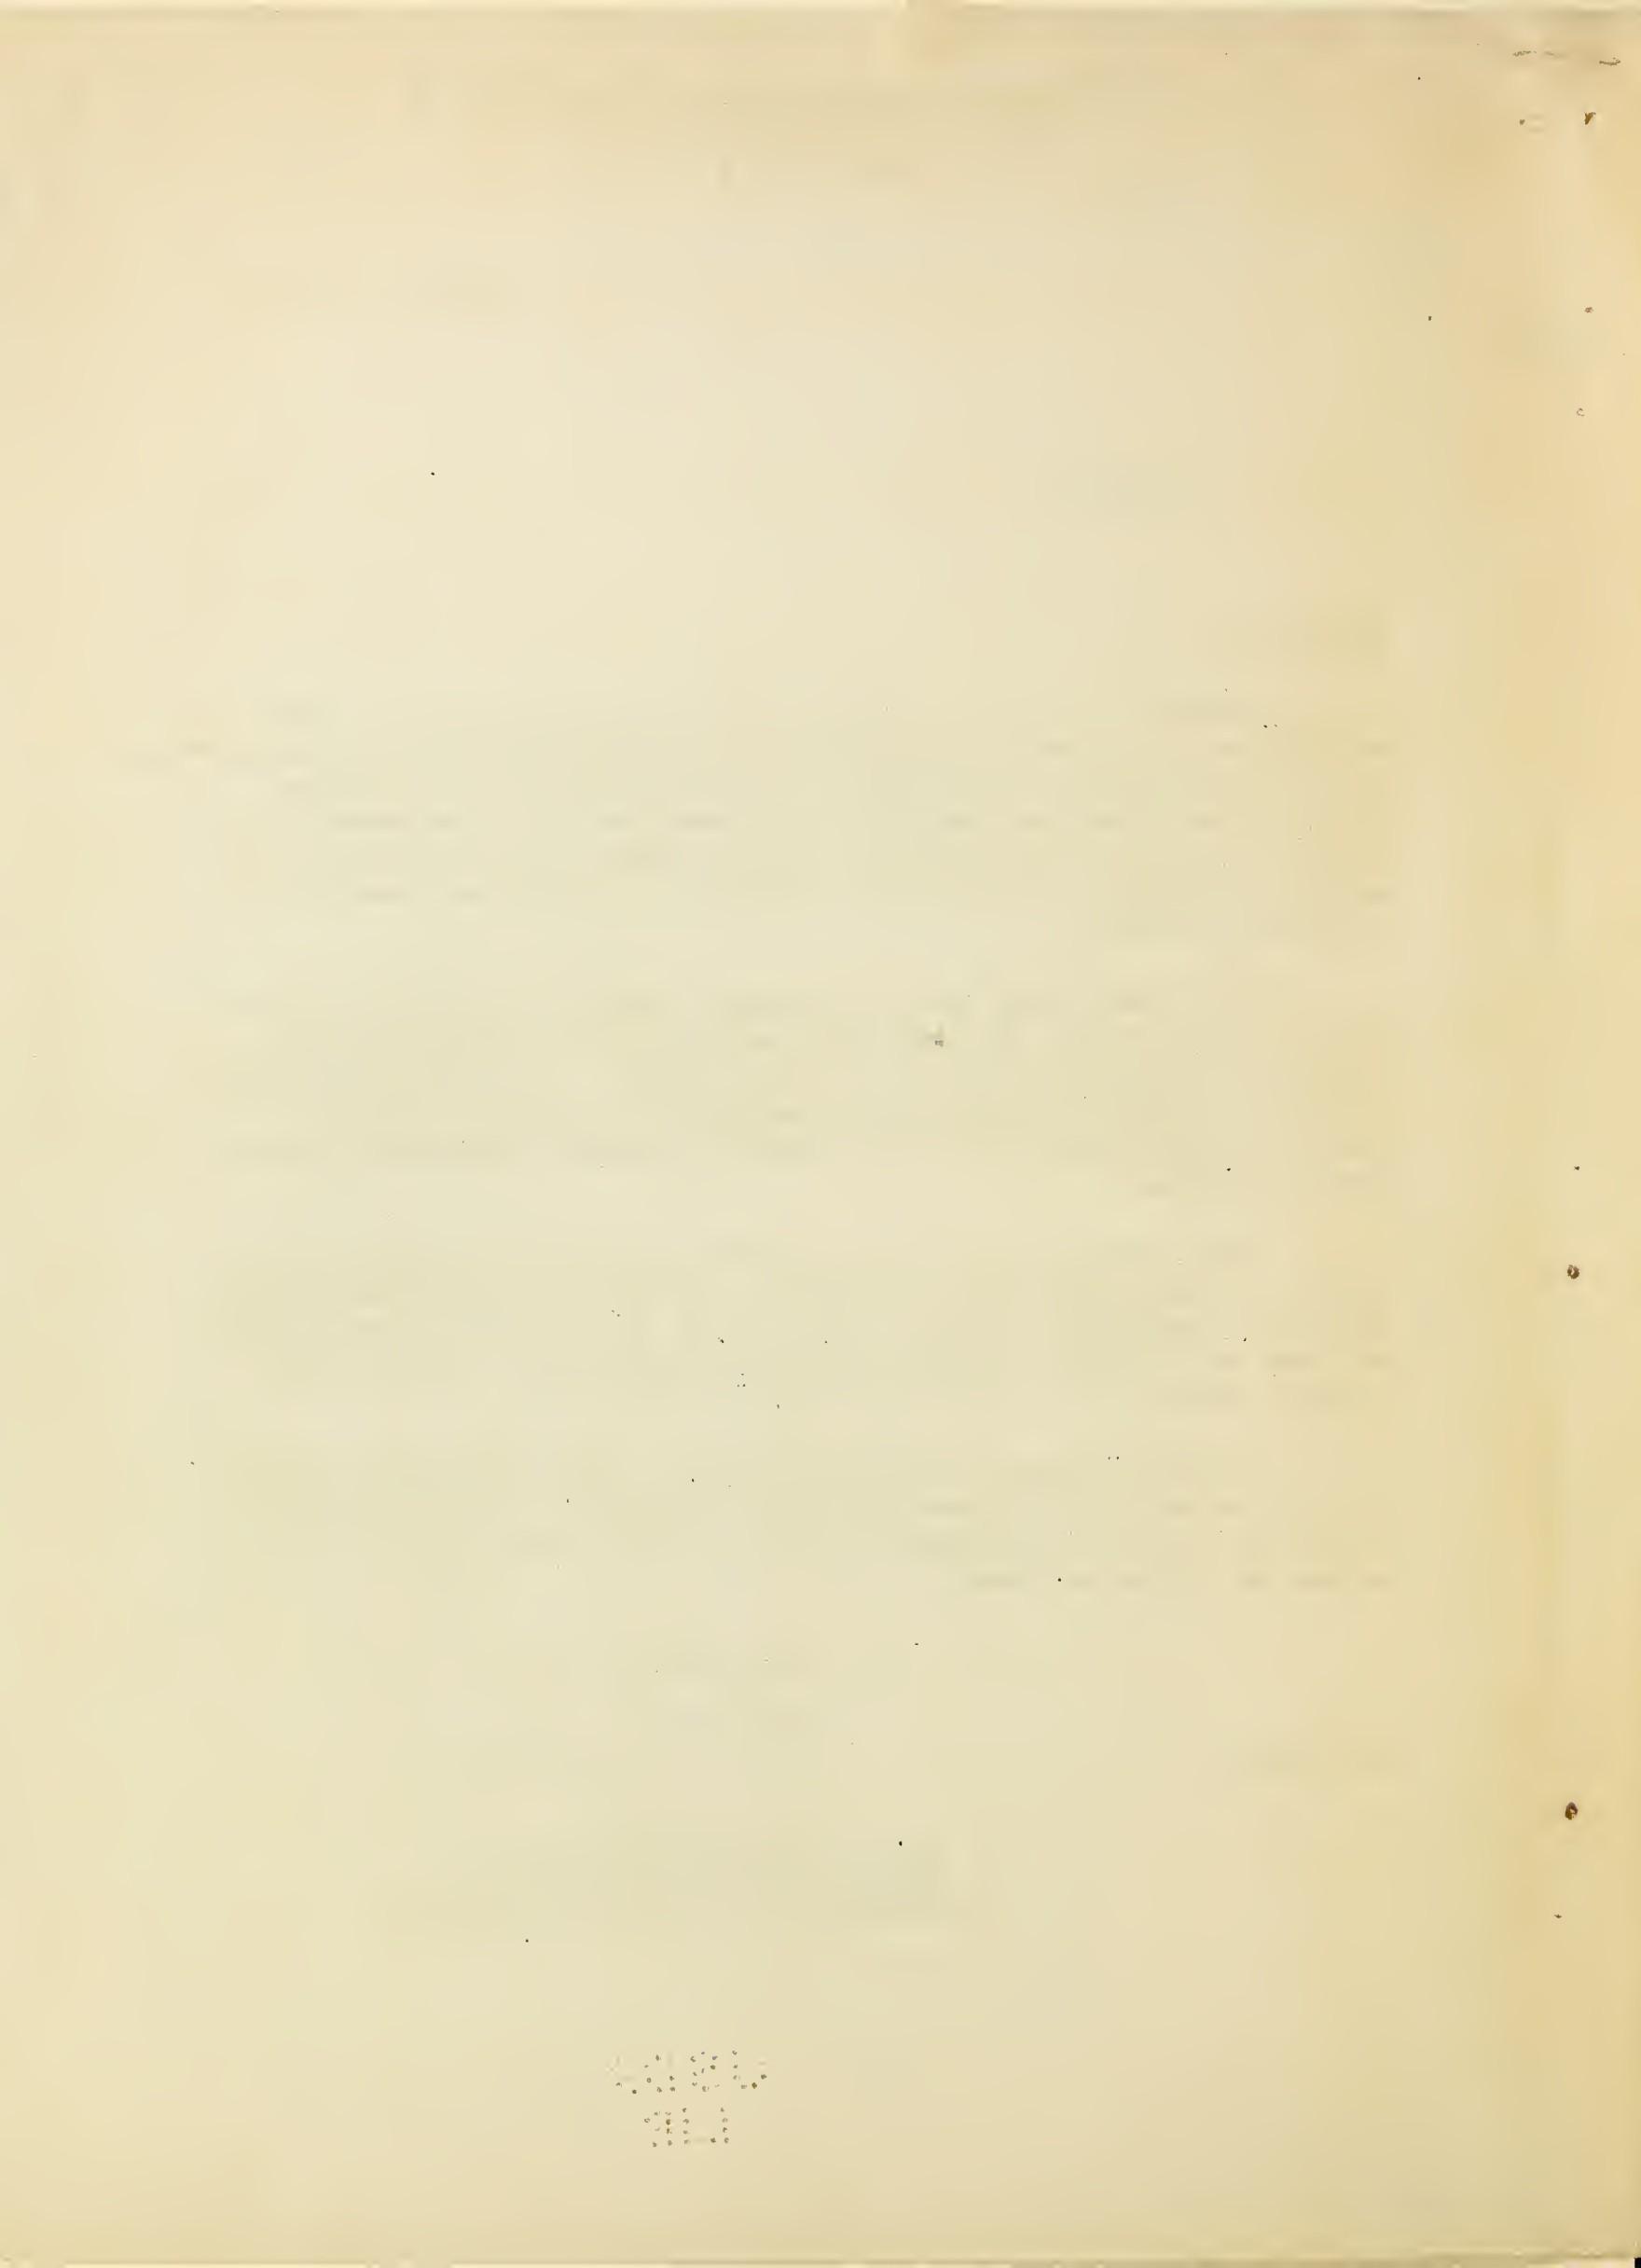

Very truly yours,

G. C. Edler

Enclosures

G. C. Edler,
Senior Marketing Specialist,
Agricultural Statistics Division.

NOT FOR PUBLICATION OR GENERAL DISTRIBUTION

The references 1/ to 7/ inclusive in the table are used to designate the following:

- 1/ Figures in this column are the totals of the June 30, 1940 stocks of the firms reporting both their 1939 and 1940 stocks and those reporting only their 1940 stocks.
- 2/ Indicates that figures have been omitted so as not to reveal the operations of an individual grower.
- 3/ Includes figures indicated by 2/ omitted under the same kind (underscored) of seed. For example, the 1940 acreage and production figures for Utah and Golden Crisp celery are included with those for "Other varieties" of celery.
- 4/ Included below with "Other white-flesh varieties" of turnip so as not to reveal the operations of an individual grower.
- 5/ Includes figures for Broccoli Itab type of turnip omitted below.
- 6/ Included above with Seven-Top type turnip so as not to reveal the operations of an individual grower.
- 7/ Includes Purple-Top Milan and White Milan turnip figures omitted above.

Note: Where figures are omitted no data were received.

ACREAGE, PRODUCTION, AND STOCKS OF VEGETABLE SEEDS IN 1939 AND 1940
